

CERTIFICATE OF PERMANENT DELETION

Attestation of permanent destruction of ShareVault data

The ShareVault identified below has been permanently deleted from the ShareVault platform in accordance with the deletion request submitted by an authorized Account Administrator. All documents, metadata, user assignments, audit history, and associated data have been removed from ShareVault active storage.

For disaster recovery purposes, encrypted backup snapshots are retained in secondary storage for up to 30 days from the date of deletion, after which they are permanently purged. These snapshots exist solely to enable recovery from a platform-wide disaster affecting all of ShareVault and cannot be used to restore an individual ShareVault; ShareVault is therefore unable to restore the deleted data under any circumstance.

This certificate serves as a record of completion of the deletion workflow and may be retained for compliance and audit purposes.
